

# Configurar Putty

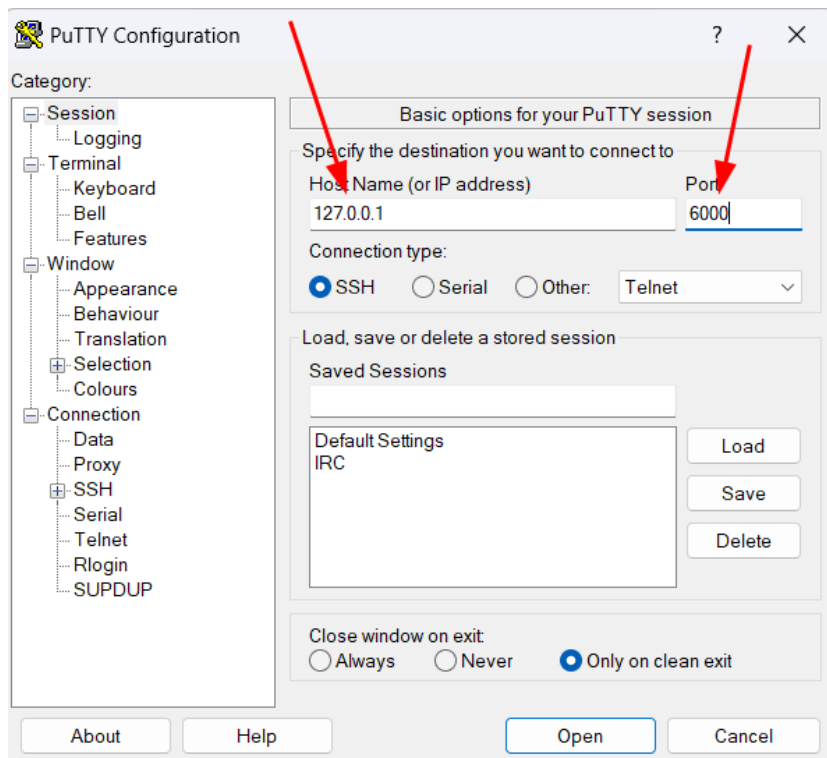

1. Fazer o download do executável

Link: <https://the.earth.li/~sgtatham/putty/latest/w64/putty.exe>

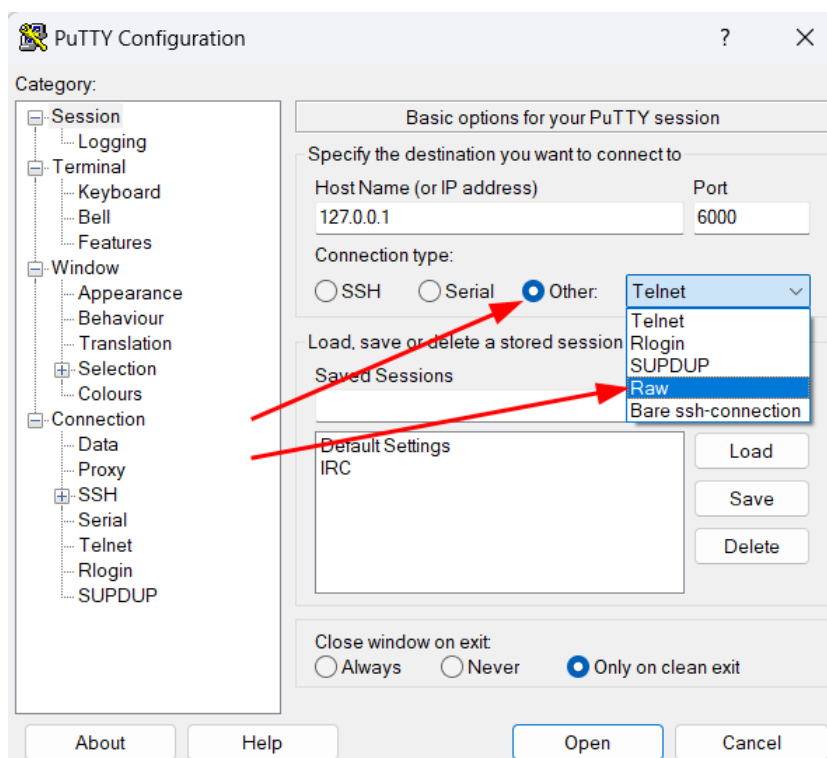

2. Abrir putty e aceder à opção “Session”

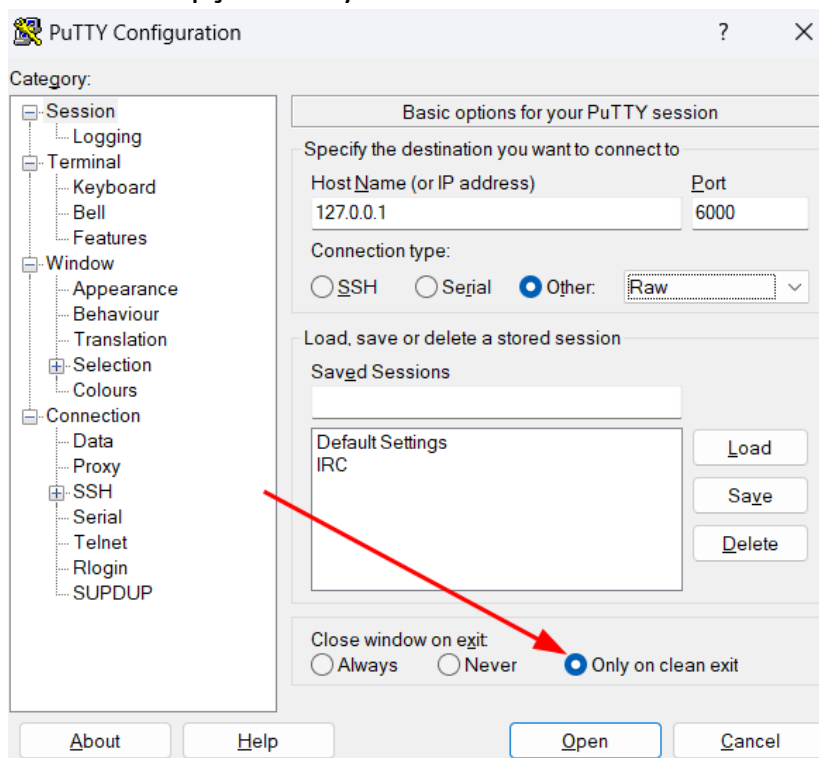

3. Introduzir o IP e Porto do servidor que nos queremos ligar  
IP: 127.0.0.1 e Porto: 6000

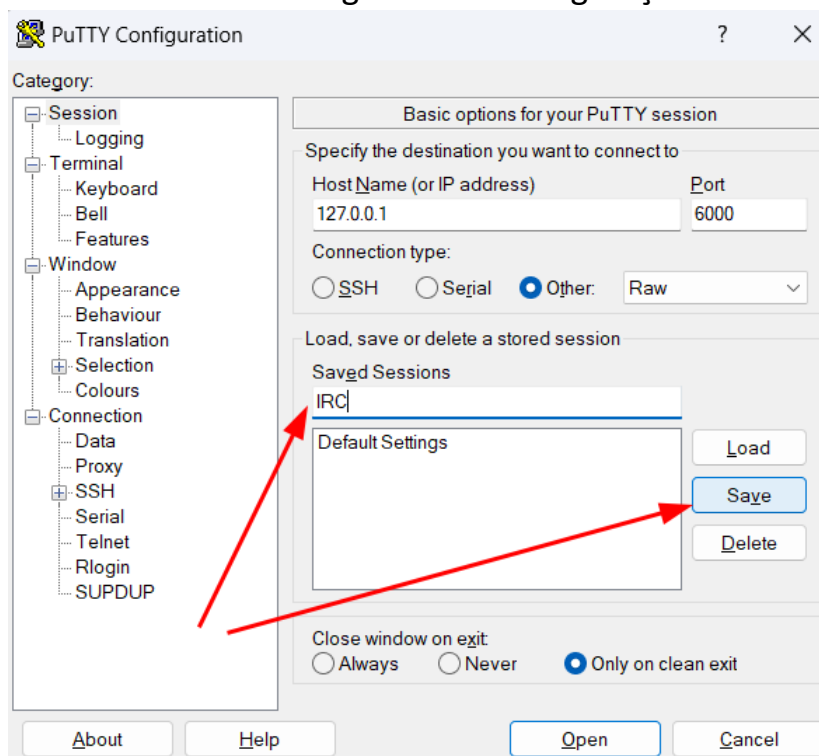

4. Alterar a connection type para “Other” e na dropdown escolher a opção “Raw”

## 5. Escolher a opção “Only on clean exit”

## 6. Adicionar um nome e guardar a configuração

7. Para utilizar o putty, basta abrir o ficheiro executável e clicar duas vezes na configuração que queremos usar
